

Public Community Drop-In Meeting: Ironwood Energy Storage Project

DATE: Thursday, November 16, 2023

TIME: Please drop by anytime between 5:00 – 8:00 PM

LOCATION: Township of Amaranth Town Hall, 374028 6th Line, Amaranth, ON

Snacks and refreshments will be served

Renewable Energy Systems Canada Inc. (RES) is pleased to invite you to a public community meeting to present and discuss a battery energy storage project in Amaranth Township. The purpose of the project would be to provide the provincial electric system with reliability services needed to support increasing electricity demand. **This would not involve any on-site electric power generation.**

The **Ironwood Energy Storage Project** is proposed on a single landowner's property, just north of Dufferin Road #109, west of County Road #11:

This project is very much at its preliminary & feasibility stage of development. That's why we think it's the best time to share our vision, present project components and timelines, outline the applicable permitting and regulatory processes we expect to engage, and especially receive your initial feedback.

We see this first occasion to meet in person as the start of a dialogue, leading to thorough consultation and engagement with all stakeholders. As we continue to evaluate the project, we will certainly be making additional efforts to engage with interested communities and stakeholders in the weeks and months ahead.

What would this project involve? This project would potentially have a footprint of approximately 15 acres and be situated within a single parcel of land. It would be comprised of various technologies allowing the system to charge and discharge electricity on demand.

What is a Battery Energy Storage System (BESS)? At its most basic level, a BESS consists of numerous, interconnected, containerized batteries (imagine a specialized shipping container) that store electrical energy for use at a later time. Operated as a single unit, this facility would be interconnected with the Ontario transmission system. This stored energy can then be drawn upon by the Ontario Independent Electric System Operator (the “IESO”) when needed to meet system reliability demands.

Should you have any questions about the event, please contact Narges Rezvani by email at Narges.Rezvani@res-group.com or by phone @ 438-340-7571.

If you are unable attend, **please be sure to visit our project website:**

<http://www.IronwoodEnergyStorage.com/> where we'll post project updates and related information.

Our team looks forward to meeting you in person and we very much hope you will be able to attend!

Best regards,

Philippe Abergel
Director, Development
Renewable Energy Systems Canada Inc.
