- 1 Except where a minimum flat fee is indicated for the Occupancy Classification or Type of Construction, the fee per square meter of floor area set out in this Schedule shall be used by the Chief Building Official in determining the permit fee.
- 2 Permit fee increases are indexed based on the Consumer Price Index, Ontario Series, and are adjusted annually, beginning in 2026.
- 3 For the purpose of this Schedule the occupancy classification and floor area shall be determined on the following basis.
 - a) The occupancy classification shall be established in accordance with the occupancy definitions of the Ontario Building Code and its appendices.
 - b) The floor area shall be measured to the outer face of exterior walls and to the center line of party walls or demising walls. No deductions shall be made for openings within the floor area (e.g., stairs and stair openings, ducts, elevators, escalators). Floor area shall include all habitable areas, including attached garages, mezzanines, finished attics and enclosed balconies.
 - c) Calculating floor area for interior finishes, partitioning, corridors, lobbies, washrooms, lounges, etc. are to be included and classified according to the major occupancy classification for the floor area with which they are associated. Where any of these areas are constructed in a shell only building, fees shall be calculated at the finished rate in this Schedule.
 - d) The occupancy classifications used in this bylaw are based on the Building Code major occupancy classifications. For mixed occupancy floor areas, the fee multiplier for the major occupancy of the floor area applies.
- 4 No additional fee applies for sprinklers, fire alarms, electromagnetic locks, or other mechanical systems or equipment proposed and installed at the same time as the construction they serve.

- 5 Where they serve single dwelling units, no additional fee applies fireplaces and unfinished basements proposed and constructed at the same time as the single dwelling they serve.
- 6 Unfinished basements for single detached dwellings, semi-detached dwellings, duplex dwellings and townhouses are not included in the floor area.
- 7 The appropriate finished fee for the proposed major occupancy applies to non-residential and multiple unit residential basements.
- 8 Where a change of occupancy from one classification to another classification is proposed, the fee multiplier for the proposed occupancy applies.

a) To offset additional investigation and administrative costs where any person has commenced construction, demolition, or changes to the use of a building prior to having submitted an application for a permit, or before having received a permit, in addition to any other penalty under the Act, Building Code, or this By-law, the permit fee shall be two times the regular permit fee. Payment of these fees does not relieve any person or corporation from complying with the Act, the Building Code, or any applicable law.

b) To offset additional costs associated with the investigation, inspection, administration, and rectification of any building where any Order is issued, a fee shall be applied as per the fee schedule. Payment of these fees does not relieve any person or corporation from complying with the Act, the Building Code or any applicable law.

c) With respect to phased or conditional permits, the fee shall be the normal fee for the proposed construction plus an additional administration fee as prescribed in this Schedule for each conditional permit or phased permit applied for.

d) Where the Township has contracted work to remedy any Building Code deficiency on any private property for failing to comply with a directive of the Chief Building Official, or Officers thereunder, the Township shall be entitled to recover the full cost of the work, plus a \$250 administration fee.
